BIOTHON 2026

Organized by Department of Bioinformatics

Sponsored by Royal Society of Biology

SOLVE REAL WORLD PROBLEMS AND WIN CASH PRIZES

BIOTHON 2026
SOLVE REAL WORLD PROBLEMS AND WIN CASH PRIZES

PRIZE POOL ₹1.8L
Total across all domains. Winners in each domain.

PRIZES:
1st PRIZE: ₹30,000
2nd PRIZE: ₹20K
3rd PRIZE: ₹10K

TOTAL 3 DOMAIN OF PROBLEM STATEMENTS
HEALTH CARE | AGRICULTURE | ENVIRONMENT & BIODIVERSITY

3-ROUND INNOVATION CHALLENGE
Bring groundbreaking solutions for each problem

ROUND 1	ROUND 2	ROUND 3
1 st June to 20 th June 2026	20 th June to 28 th June 2026	4 th July 2026
Online ppt round	Online video round	Offline On Campus Final round

FREE FOOD Health & Refreshments

ABOUT THE UNIVERSITY

Marwadi University, Gujarat, India was established under the Gujarat Universities Act (Act 9 of 2016) on 9th May 2016. Marwadi University is accredited with NAAC A+ Grade and Centre of Excellence by Government of Gujarat which offers various courses under the Faculty of Engineering and Technology, Faculty of Diploma Studies, Faculty of Science, Faculty of Management Studies, Faculty of Computer Application, Faculty of Physiotherapy, Faculty of Law, Faculty of Pharmacy and Faculty of Arts. Marwadi University is a prominent University in Western India with a global vision. Students from various countries have chosen Marwadi University as their home for education and excellence. University is recognized by the Government of Gujarat and Government of India and concerned statutory and professional bodies and proud members of University Grant Commission (UGC), All India Council of Technical Education (AICTE), Association of Indian Universities (AIU), IEEE, IUCEE, ISTE, CSI, IE, PCI, BCI, and Association of Commonwealth Universities. In addition, University is also associated with Study in India and Study in Gujarat.

ABOUT THE DEPARTMENT

The Department of Bioinformatics offers an undergraduate program in Bioinformatics Engineering, designed to explore modern and advanced biological data using computer science, information technology, and artificial intelligence. Students will gain in-depth knowledge of advanced genomic, transcriptomic, proteomic, and metabolomic data, and leverage various biological sources to benefit society through the application of computer science. This course is ideal for students interested in bioinformatics, biotechnology, medical devices, artificial intelligence, machine learning, cancer biology, recombinant DNA technology, and related fields. Students will also have the opportunity to learn algorithms used in genomic data analysis. The department also features an outstanding computer facility.

ABOUT BIOTHON 2026

BIOTHON 2026 is a National Level Inter-College Hackathon designed to inspire innovation, creativity, and problem-solving among students in the fields of Biology, Technology, and Applied Sciences. The event serves as a dynamic platform where young innovators, researchers, developers, and aspiring entrepreneurs come together to address real-world challenges through interdisciplinary approaches and cutting-edge ideas. Biothon 2026 aims to bridge the gap between biological sciences and emerging technologies by encouraging participants to develop impactful solutions for some of today's most critical global issues. Open innovation is allowed, but it must align with one of the chosen domains. Health Care, Agriculture or Environment & Biodiversity.

PATRONS

Prof. (Dr). Rajendrasinh Jadeja

PARTICIPANT GUIDE

WHO CAN PARTICIPATE?

Open to all undergraduate and postgraduate students, researchers, and innovators from any recognized college or university in India.

- Teams of 2 to 4 members.
- Cross-college teams are warmly welcomed!

EVENT TIMELINE AND SCHEDULE

DATE	ROUND	FORMAT
1st June to 20th June 2026	Round 1 - PPT Submission	Online - Idea Presentation
20th June to 25th June 2026	Round 2 - Video Submission	Online - Video Explanation
4th July 2026	Round 3 - Grand Finale	Offline - On Campus, Marwadi University

COMPETITION ROUNDS

Round 1 - PPT Submission (1st June 2026)

The first round is your opportunity to demonstrate your understanding of the problem and present a compelling solution concept. Submissions are evaluated online by the organizing committee.

What You Need to Do

1. Register online and select one domain and a specific problem statement.
2. Download the official PPT template provided by the organizing committee.
3. Prepare your presentation covering: problem analysis, proposed solution, technology stack, and expected outcomes.

4. Upload the completed PPT through the submission portal **before the deadline which is 20th June 2026.**

5. Round 1 evaluation will be completely based on whether the official ppt template has been followed or not. Failure to do so will result in disqualification & the participants will not be promoted for round 2.

Round 2 - Video Submission (20th June 2026)

Round 2 is open only to teams shortlisted from Round 1. This stage asks you to record a detailed walkthrough video of your solution, giving judges a deeper look at your team's understanding, communication, and innovation.

What You Need to Do

1. Confirm your qualifier status - only Round 1 shortlisted teams may proceed.
2. Record a clear video of your team lead explaining the problem, solution, approach, and expected impact using the ppt you submitted.
3. Video must be a maximum of **5-7 minutes** in MP4 format with **clear audio and video quality.**
4. Upload the video **on YouTube with your personal Gmail account (Make a channel) and submit the link of the uploaded YouTube video in the submission portal** before the given deadline which is **25th June 2026.**
5. Top teams from this round will be selected as Finalists and invited for the Offline Grand Finale on **4th July 2026 at Marwadi University.**

Round 3 - Grand Finale (Offline) (4th July 2026)

The Grand Finale is a full offline event hosted at Marwadi University, Rajkot, Gujarat. Selected finalists from all domains gather to present their complete solutions to an expert judging panel. This is where ideas meet execution.

Live Working Prototype Demonstrate your solution live. Functional models, software demos, or hardware prototypes are expected.	Idea Pitch to Judges Present the problem, solution, impact, and scalability to a panel of domain expert judges.	Q&A with Expert Panel Judges will ask technical and strategic questions about your approach, team roles, and roadmap.
--	---	---

PRIZES & REWRDS

Biothon 2026 offers a total prize pool of ₹1,80,000 distributed across all three domains. Each domain carries its own independent prize pool giving every team a fair shot at winning within their chosen field.

PRIZE	HEALTH CARE	AGRICULTURE	Environment & Biodiversity
1st Place	₹30,000	₹30,000	₹30,000
2nd Place	₹20,000	₹20,000	₹20,000
3rd Place	₹10,000	₹10,000	₹10,000

HOSPATILITY & PERKS

We want every finalist to have an exceptional experience at Biothon 2026. Here's what's in store for you at the Grand Finale:

Free Meals All meals during the event day are fully covered breakfast, lunch, snacks, and dinner. No need to worry about food!	Campus Experience Explore our vibrant NAAC A+ rated college campus networking zones, maker spaces, and mentor interaction sessions await.
Night Stay (Outstation Teams) Outstation participants will be provided accommodation on request basis with minimal charges.	Certificates & Goodies All participants receive certificates of participation. Finalists get special recognition certificates.

JUDGING RUBRIC

Each domain is evaluated on a set of criteria tailored to its unique challenges. Familiarize yourself with the rubric for your domain so you can structure your solution and pitch accordingly.

Domain 1: Health Care - Judging Rubric (Total: 100 Points)

Criterion & Points	Sub-Criterion 1	Sub-Criterion 2
1. Problem & Impact (20 Points)	Real Need Does the project solve a genuine, important healthcare challenge?	Real Value Will it actually make life easier for patients, doctors, or healthcare workers?
2. Innovation & Originality (20 Points)	Fresh Idea Is the solution creative, unique, or a clever improvement over existing technology?	Out-of-Box Thinking Did the team think differently to address the problem in a new way?
3. Tech & Functionality (25 Points)	Works Well Does the prototype or app actually work as promised?	User-Friendly Is the design simple, easy to navigate, and intuitive for end users?
4. Business & Future Plan (15 Points)	Feasibility Can this technology actually be built and used in the real world?	Scalability Can it be expanded to help more people over time?
5. Presentation & Pitch (20 Points)	Clear & Confident Is the explanation clear, jargon-free, and strictly within the time limit?	Question Handling Can the team answer the judges questions effectively?

Domain 2: Agriculture - Judging Rubric (Total: 100 Points)

Criterion	What Judges Are Looking For
1. Problem Solving (Relevance) (20 point)	Does the idea solve a real and important challenge for farmers or the agriculture industry? The problem must be genuine, urgent, and directly affect farming communities.
2. Innovation (Creativity) (20 point)	Is the idea unique, new, or a clever improvement on existing farming practices? Judges reward teams that bring a fresh perspective or reimagine how a known problem is solved.
3. Feasibility (Practicality) (20 point)	Can this idea actually be used in the real world? Judges will consider the cost of implementation, availability of required technology, and accessibility of resources for farmers.
4. Impact (Benefit) (20 point)	Will this solution significantly increase crop yield, save water, improve soil health, or increase farmers income? The greater and wider the benefit, the higher the score.
5. Presentation (Pitch) (20 point)	Is the idea explained clearly and confidently? Can the team answer judges questions well and demonstrate a concrete, believable plan for the future?

Domain 3: Environment & Biodiversity - Judging Rubric (Total: 100 Points)

Criterion	What Judges Are Looking For
1. Problem Solving (Relevance) (20 point)	Does the idea solve a real, urgent, and important challenge in ecology, wildlife conservation, or the natural environment? The problem must demonstrate genuine environmental significance.
2. Innovation (Creativity) (20 point)	Is the idea unique, brand new, or a clever and improved way to protect nature or study biodiversity? Judges look for approaches that stand out from conventional solutions.
3. Feasibility (Practicality) (20 point)	Can this idea actually be used in the real world? Judges consider the budget required, availability of technology, and natural resources needed for deployment and maintenance.
4. Impact (Benefit) (20 point)	Will this solution significantly protect endangered species, restore natural habitats, reduce pollution, or help ecosystems recover? Teams should clearly quantify the expected environmental benefit.
5. Presentation (Pitch) (20 point)	Is the idea explained clearly and engagingly? Can the team answer questions confidently and demonstrate a well-thought-out, actionable plan for the future?

Rubric Summary - All Domains at a Glance

Criterion	Health Care	Agriculture	Environment & Biodiversity
Problem Solving & Impact	20 pts	20 pts	20 pts
Innovation & Originality	20 pts	20 pts	20 pts
Tech / Feasibility	25 pts	20 pts	20 pts
Business Plan / Impact	15 pts	20 pts	20 pts
Presentation & Pitch	20 pts	20 pts	20 pts
TOTAL	100 pts	100 pts	100 pts

TIPS FOR WINNING SUBMISSION

Round 1 - PPT Tips

- Lead with the problem: clearly articulate why your chosen problem matters and who is affected.
- Quantify the impact: use data and statistics to make your problem compelling.
- Explain your solution clearly with a simple architecture or workflow diagram.
- Include the technology stack you plan to use, and why it's the best choice.
- End with expected outcomes and success metrics.

Round 2 - Video Tips

- Keep it structured: problem → solution → demo walkthrough → impact → roadmap.
- Ensure good lighting, clear audio, and a stable camera setup.
- Stay within the 5–7 minutes limit - judges value concise, focused presentations.

Round 3 - Grand Finale Tips

- Bring a working prototype or demo - live demonstrations are highly valued by judges.
- Be prepared for deep technical questions about your architecture and design choices.

- Discuss scalability, cost-effectiveness, and real-world deployability of your solution.
- Practice your pitch as a team and align on who covers which part.

Important Reminders

- Each team selects only ONE domain and ONE problem statement for the entire competition.
- Teams of 2 to 4 members only. Cross-college teams are allowed.
- All deadlines are strict. Late submissions will not be accepted.
- **Finalists must be physically present at Marwadi University, Rajkot on 4th July 2026.**
